I am under the impression a rule change is forthcoming, adding racial bias to the Moral Character Rule. It is my hope they will be using our case as an example to show the need for such a change. I hope this helps.

Chief:

What you have provided is fine (unsigned copies). As we (VolusiaExposed) stated in our previous email - we took no position whether the violations were or were NOT Moral Character violations. But after reviewing CJSTC standards - we tend to agree with your office and FDLE - that making racist statements about shooting minorities (to include children) is NOT a defined Moral Character standard. Stealing TV cable or DUI - now those are moral character violations.

One would imagine - that post Ferguson, MO., Baltimore, MD., and L.A., CA., that such behaviors would be defined moral character violations - by Florida's number one law enforcement agency - the Florida Department of Law Enforcement (CJSTC).

Since per CJSTC rules - your agency is ONLY required to send a copy of the case file to FDLE / CJSTC WHEN a moral character violation is sustained - it is interesting that FDLE requested copies of the case files.

We suspect the focus of our pending article will address the fact that these officers' sustained and admitted behaviors are not moral character violations. We suspect that the public (in general, NAACP, BLM) are NOT aware that such behaviors will NOT cause these officers' LEO certificates to have disciplinary actions applied. Hopefully our article will enlighten the public and become the catalyst for an update to Florida's moral character standards.

Your agency appears to have taken quick and appropriate actions.

Regards,
